Reforming the integrity system of the EU institutions

Alex Johnson · Friday, February 19th, 2016

Transparency International EU is closely monitoring different initiatives around reforming the integrity system of the EU institutions. In this context, TI EU is currently providing input to the work on the following two issues:

- (1) the European Parliament's own-initiative report on "Transparency, accountability and integrity in the EU institutions" by Sven Giegold, and
- (2) the reform of the European Parliament ethics regime and the Code of Conduct for members.

For detailed recommendations, please refer to the following documents:
