

Transparency International EU

The global coalition against corruption

TI EU 2024 Election Manifesto

Pia Engelbrecht-Bogdanov · Friday, May 17th, 2024

When European citizens go to the polls, they will be exercising their power to hold their elected representatives accountable. Our election manifesto, spanning all areas of EU anti-corruption, outlines how MEPs can fight to make the EU more transparent, more accountable, and more protected against corruption, so that citizens can assess its actions properly. Our key demands are:

- The EU institutions must **strengthen their ethics and integrity frameworks**, including by ensuring effective monitoring, oversight and enforcement.
- The EU must **step up the fight against illicit financial flows** and promote greater financial and business integrity.
- The EU must **defend the rule of law against internal and external threats**. Civic space must be protected.
